NEW NOTES

Note #1

- Invitee must be able to select and browse invitation categories: (before registering). Here are some initial categories. See examples at https://www.greetingsisland.com/ or https://www.greenvelope.com/
  — Birthday Party
  — Office Party
  — Wedding
  — Engagement
  — Baby Shower
  — Bridal Shower
  — Umabo
  — Umembeso

NOTE #2

- Each category will display only invitations fitting that category

NOTE #3

- The only button at first should be "Customise" not "Details". Once the inviter has saved a template (let's call it "MY INVITATIONS" in the app), a 2nd button (call it SEND) must appear next to CUSTOMISE.
- The SEND button will be inactive unless
  — Inviter has created a distribution list
  — Inviter has paid for that invitation
  — Payment is per invitation template saved

NOTE #4

- The invitation layers must be on top of each other, not side by side. E.g., IMAGE or VIDEO LAYER as a backround another transparent image as an overlay of flowers, or text over the other items.

NOTE #5

- These are the colours to use

NOTE #6

- Invitation Sections must be properly paginated (invitee should be able to choose which pages to add, main page + map, or main page plus something else.

OLD NOTES

USER SECTION: A

- registration (name, email, mobile, password, account status)
  — creates subdirectory in website folder
  — creates invitation url based on above folder
- logs in
- resets pwd
- browse design (or categories)
- short lists design (while browsing, user can mark invitations they like)
- edit design (customise only text layers, admin can customise all layers)
- save design
  — Printable Status: On/Off (determines whether invitation can be saved to pdf or printer, enables only once payment has been made)
  — Gif Export: On/Off
  — Video Export: On/Off ()
- deletes saved design
- CREATES/DELETES/EDITS MAILING LIST (THIS MAILING LIST HAS FULL NAME, EMAIL ADDRESS, WHATSAPP NUMBER AND USER CAN TICK WHICH TO USE WHEN SENDING INVITATION, I.E., USER'S EMAIL OR WHATSAPP NUMBER
- STATUS (ACTIVE/INACTIVE) - ACTIVE IF INVITATION IS NOT PAST EVENT DATE, IF IT IS NOT OLDER THAN 6 MONTHS AND IF PAID FOR)
  — has name
  — has RSVP email address
  — has RSVP number
  — has RSVP recipient name
  — has "sendto" options
    + email
    + whatsapp
  — Notifies client with each update and send updated RSVP list
- sends designs to mailing list

UI DESIGN SECTION: B

- INTERFACE
  — 6:19 WITH 19:6 BACKGROUND (FULL SCREEN) LAYERS TRANSPARENT AND ON TOP OF EACH OTHER

DIGITAL INVITATION TEMPLATE SECTION: C

- had a category (party, baby shower? wedding, etc.)

- has 8 draggable layers (backround layer (1), font OR TEXT layer (5), image overlay (2), video layer (1))
  — RSVP stands carousel layer (1) (important: scrolls at the top displaying random comments invitee left when responding to RSVP, invitee can mark his comments public or private)
  — Watermark layer (to protect content like Shutterstock)
    + can be set to visible/invisible
    + has copyright info
  — CSS animation object layer (12)
    + animation options
    + colour options
- Has audio object

    + choose from list of songs (songs will be loaded in subdirectory on website)
    + save selecting soundtrack
- each layers has pre-set CSS animations
- each layer had font options
  — font size options
  — font family option
  — font color options
- can be saved
  — has owner
  — has 'sendable' status on/off. SENDABLE STATUS is just another field in the database which has TRUE or FALSE and the status is determined by a few things. For example, once an inviter has SELECTED an invitation template to edit they should not be able to send it to anyone unless
    + they have created a distribution list,
    + they have paid]
  — status has age (max 6 months). This means an inviter cannot hae an event that will take place 8 months in the future
  — displays RSVP stats
    + RSVP respondents
    + RSVP comments
    + RSVP summaries

CLIENT SECTION: D
- RSVP by clicking on a link
- add comment on RSVP
- choose whether comment & RSVP is public or private
- receives automatic confirmation of RSVP

ADMIN SECTION: E
- edit user
- edit mailing lists

- send message to client
